

Feed Management Training

September 12, 2024

NATIONAL ANIMAL NUTRITION PROGRAM

Charlotte Kirk Baer, NRCS
Heidi Rossow, NANP, University of California, Davis

Natural
Resources
Conservation
Service

nrcs.usda.gov

Our Purpose Today

- Share knowledge on feed management and the NRCS Conservation Practice Standard, Feed Management (Code 592)
- Help you leverage resources, allow you to better help clients, and expand your network for conservation projects
- Provide a general understanding and an overview of required items to meet Technical Service Provider (TSP) certification criteria

Meeting Agenda

- **First half**

- Conservation planning
- Science of climate-smart livestock feeding
- Feed Management Conservation Practice Standard

- **Last half**

- Regional Conservation Partnership Program information
- Technical Service Provider overview and information

- **Participants**

- 55 NRCS conservation professionals
- 10 Industry consultants, solution providers
- 5 University scientists and educators
- 5 State and private association and organization representatives

- **Hosts**

- National Animal Nutrition Program (NANP)
- Natural Resources Conservation Service (NRCS)

NANP and NRCS Partnership

- Facilitate science-driven dialogue on climate-smart feed management.
- Provide accessible and user-friendly feed and animal nutrition information for conservation professionals.
- Deliver targeted education and training opportunities for various stakeholders.
- Contribute expertise to enhance NRCS evaluation tools and modeling.
- Serve as a forward-looking forum to address future needs in climate-smart animal agriculture.

Logistics

- Questions should be posted in the chat, live responses
- Meeting will be recorded and posted on:

The Conservation Webinar Portal

<https://conservationwebinars.net/webinars/feed-management-training>

The screenshot shows the 'Feed Management Training' webinar page on the Conservation Webinar Portal. The page features a navigation bar with links for 'LIVE WEBINARS', 'ON-DEMAND WEBINARS', 'ABOUT', 'HELP', and 'CALENDAR'. The main content area includes the title 'Feed Management Training' and 'SPONSORED BY: USDA NRCS'. Below this is a banner for the 'Science & Technology Training Library' with the subtitle 'Webinar Portal for Conservation of Natural Resources'. A date and time indicator states 'This event is scheduled for Sep 12, 2024 10:30 am US Eastern.' A 'HOW TO REGISTER / JOIN' button is visible. The 'Webinar Details' section on the right shows the date 'Sep 12, 2024 10:30 am US Eastern' and a length of '06:30 (hh:mm)'. A 'When' dropdown menu is also present.

NANP

National Animal Nutrition Program (2010)

Provides research-based data on animal nutrient needs, feed ingredients, feeding strategies, and animal performance as well as software, training tools, and educational materials to support research.

<https://animalnutrition.org/>

NANP

Comprised of 31 scientists from 22 institutions

- Coordinating Committee
- Modeling Committee
- Feed Composition Committee
- **Climate Smart Feed Management Committee**

NANP

Has provided data for

- Fine tuning animal nutrition
- Improving animal health
- Developing new feeds
- Predicting climate change
- Impacting human health
