

## ***Green Value: A tool for simplified financial analysis of forest-based initiatives***

***September 28, 2017***

***Dr. Shoana Humphries, Independent Consultant  
Dr. Gregory Frey, USDA Forest Service***

[www.green-value.org](http://www.green-value.org)

## **Background**

- From 2006 – 2008, Shoana Humphries and Dr. Thomas Holmes (US Forest Service) investigated the financial viability and socio-economic impacts of new forest enterprises in Brazil.
- They turned their research method into a financial analysis tool, which became Green Value.
- From 2012 – 2017, the Strengthening Community-based Forest Enterprises in the Amazon Region project was implemented through Earth Innovation Institute.
- Green Value is now being promoted in the US and around the globe.

[www.green-value.org](http://www.green-value.org)

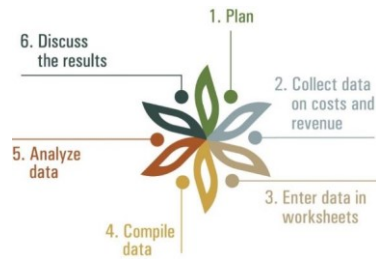

## What?

Green Value provides a **method** and **materials** for monitoring and analyzing costs and income:

- different types of products and/or services
- 1 to 3 products at a time
- 1 to several production cycles

*Simplified approach  
with six steps*

[www.green-value.org](http://www.green-value.org)

## What?

Green Value – *additional points*

- Users are encouraged to include all costs
  - subsidized machinery/equipment
  - training
  - technical assistance.
- NOT intended to replace accounting systems.

[www.green-value.org](http://www.green-value.org)

## Who?

Designed for forest-based initiatives (FIs), including:

- family forest owners / farmers
- community associations / enterprises
- small to medium scale forest enterprises
- cooperatives
- other private businesses (consultants, contractors, etc.)
- \*\* can be at different points in value chains.

Users include:

- administrators
- collaborators (e.g., from NGOs, government agencies, aid programs)
- service providers (e.g., consultants, contractors)
- researchers.

[www.green-value.org](http://www.green-value.org)

## Why?

- **Strengthen forest-based initiatives** with regard to:
  - management capacity (financial information, decisions, transparency)
  - long-term viability and sustainability.
- **Increase awareness** within the forestry sector about the role of FIs in:
  - local development (financial benefits)
  - management of forests and other natural resources.

[www.green-value.org](http://www.green-value.org)

## Why?

- **Motivate** governments, donors, industries, and other collaborators to:
  - invest in FIs: credit, technical assistance, purchases
  - improve the context in which FIs operate: illegal markets, inappropriate and/or conflicting policies, highly bureaucratic systems, poor infrastructure.

[www.green-value.org](http://www.green-value.org)

## How?

The tool comprises a **User's Guide & pre-formatted worksheets** for each step.

[www.green-value.org](http://www.green-value.org)

## How?

The **worksheets** are used to organize financial information by

- costs
  - activity: 3 – 5 main productive activities + administrative activities
  - types of inputs: labor, materials/services, and machinery/equipment
- income
  - sales
  - other sources of income.

The **worksheets** are completed for each productive period (maximum 1 year).

[www.green-value.org](http://www.green-value.org)

## How?

Options:

- The worksheets are adaptable for each FI.
- The Net Present Value worksheet can be used to analyze results for multiple productive periods.
- Once you have complete cost and income information, Green Value can be used to run alternative scenarios.

[www.green-value.org](http://www.green-value.org)

## Diverse products/services analyzed to date

### Timber products:

- Standing trees
- Logs in forest and in the patio
- Lumber
- Finished products

### NTFPs and services:

- Artisan textiles
- Bamboo
- Brazil nut
- Natural latex
- Agricultural crops
- Fruit pulp
- Freshwater fishery
- Ecosystem services
- Tourism

Photos: EIT

## Potential uses in the US

- Timber harvests in natural forests or plantations
- Firewood
- Agroforestry systems
- Silvo-pastoral models
- Non-timber forest products (e.g., pine straw, mushrooms)
- Services (e.g., hunting, fishing, environmental services)

## Example from Latin America

**Producer:** community enterprise in Latin America  
**Product:** dimensional lumber from a natural forest  
**Time period:** 1 year  
**Activities:**

- (1) Plan
  - (2) Fell trees
  - (3) Tree removal
  - (4) Log measurement/transport
  - (5) Milling
- + Administrative costs

**Note:** the financial information shown in the following worksheets has been modified and is not from any particular community forest enterprise in Latin America.

[www.green-value.org](http://www.green-value.org)

(2, 3) Enter: Labor (Time)

Name of Initiative:

**Instructions:** Use this worksheet for the "Time" option to enter information about temporary workers for each major activity related to the product being analyzed (e.g., Inventory, Harvesting, etc.), as defined in Step 1. ....

Activity: (1) Plan Supervisor: Carlos

General Information			Workers											
First day of the week			Name of Worker	Position	Days Worked (1 = one complete day, 0.5 = half day, 0 = did not work)							Subtotal of Days Worked Sum	Daily Wage (\$)	* Subtotal of Wages (\$)
Day	Mo.	Year			M	T	W	Th	F	Sat	Sun			
↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
1	5	13	Joaquin	Compass operator	1	1	1	1	1	0	0	5	90.00	450.00
1	5	13	Jaime	Machete operator	1	1	1	1	1	0	0	5	85.00	425.00
1	5	13	Laura	Tree identifier	1	1	1	1	1	0	0	5	100.00	500.00
...	...	...	...	...	...	...	...	...	...	...	...	...	...	...
<b>Subtotals per activity</b>											<b>15</b>		<b>\$ 1,375.00</b>	

Activity: (2) Fell trees Supervisor: Enrique

General Information			Workers											
First day of the week			Name of Worker	Position	Days Worked (1 = one complete day, 0.5 = half day, 0 = did not work)							Subtotal of Days Worked Sum	Daily Wage (\$)	* Subtotal of Wages (\$)
Day	Mo.	Year			M	T	W	Th	F	Sat	Sun			
↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
1	7	13	Beto	Chainsaw operator	1	1	1	1	1			5	100.00	500.00
1	7	13	Clara	Assistant	1	1	1	1	1			5	85.00	425.00
...	...	...	...	...	...	...	...	...	...	...	...	...	...	...
<b>Subtotals per activity</b>											<b>10</b>		<b>\$ 925.00</b>	

(2,3) Enter: *Mat-Services*

Name of Initiative:

**Instructions:** Use this worksheet to enter data for Materials (e.g., aluminum tags, gasoline, oil) and Services (e.g., preparation of Annual Operating Plan, training) for each activity related to forest management (e.g., Inventory, Harvesting, etc.), as defined in Step 1. **\*\*Materials are items that last less than one year or harvest season.\*\*** .....

Activity: (1) *Plan* Supervisor: *Carlos*

Date			Cost Data				
Day	Mo.	Year	Item	Unit	Quantity	Price / Unit (\$)	* Subtotal Cost (\$)
↓	↓	↓	↓	↓	↓	↓	↓
1	3	2013	spray paint	box	20	108.00	2,160.00

Income for workers and local families

Income for local businesses

Critical information for collaborators, donors, researchers, governments

Financial viability

**Other examples**

- In a community pine plantation in Peru, the edible mushrooms that appear in the plantations are more lucrative than the trees.
- In Colombia, official papers for permission to transport timber (which cost 5 times as much as fake ones) increased total cost for an intermediary by 16% (USD 46,000). Fake papers generate zero revenue for the state and interrupt the legal chain of custody.
- A bamboo enterprise in Ecuador was able to increase profitability by 43% after purchasing machinery to replace labor.

## Example of potential use in the US

[www.green-value.org](http://www.green-value.org)

## Example of potential use in the US: silvopastoral system

*Producer:* landowner in Southeastern US

*Products:* timber and calves

*Time period:* 16 years

*Phases of production for each product:*

Year	Timber			Calves			
	Second thin	Third thin	Final harvest	Establish pasture	Improve pasture	Spray and Burn	Graze and Maintain
2012	X			X			
2013					X		X
2014					X		X
2015							X
2016							X
2017							X
2018							X
2019							X
2020		X				X	X
2021							X
2022							X
2023							X
2024							X
2025							X
2026							X
2027			X				X

## Example of potential use in the US: silvopastoral system

A set of worksheets was completed for each phase of activities for each product.

### Timber – 3 phases

### Calves – 4 phases

(1) Analyze: Sum (2) Analyze: Sum (3) Analyze: Summary

**Instructions:** Use this worksheet at the end of the period of analysis to summarize the total costs, organized by type and by activity, and total income related to the product or service being analyzed. First, enter information about the producer in the tables "Information about the Producer" and "Basic Operational Information". Then enter the major productive activities in the first column in the table "Costs by Activity and Cost Type"; the Administrative costs are always included after the list of major productive activities. Rows can be added to the table as necessary. The columns without arrows either contain links or formulas. The data for the table "Costs by Activity and Input Type" are copied over by links from each of the (6) Complete worksheets for cost data as well as the (2,3) Enter: Sales worksheet for income data. This data can be entered manually if you prefer.

**Reminders/Clarifications:** Verify all links are correct. If you have an ERROR in any cell, you must update the link or formula in the cell. In the "Basic Operational Information" table, if the type of cell varies for the products or services sold, do not fill in the "Unit of Sale" and "Average Quantity Sold/Area" cells. Formulas for the calculations in this worksheet are explained in Chapter 2 of the User's Guide.

Net Present Value*	\$34,807.61	\$34,494.40	(\$313.21)	\$135,896.34	\$150,060.20	\$14,163.85	\$170,703.95	\$184,554.59	\$13,850.64
Rate of Return			-1%			10%			8%

Note: Costs and returns shown here do not represent any particular individual's true values.

## Options for using Green Value

- Download the User's Guide and worksheets, and follow instructions
  - 1 product/service or multiple
  - Simple or Advanced version (Choose Simple to start out)
- ❖ Optional: Net Present Value worksheet
- Organize a Green Value workshop with partners (e.g., state forestry associations, extension agents, continuing education programs).
- Teach others how to use Green Value with the Facilitator's Kit.
- \*\*All materials are available in English, Spanish, and Portuguese.

We love to receive feedback on Green Value materials and results.

FAQS  
ABOUT THE AUTHORS  
PARTNERS

Helping family and community enterprises meet their goals.

Green Value helps small enterprises monitor and evaluate costs and income, negotiate fair prices, improve financial management and transparency, and strengthen their long-term sustainability.

www.green-value.org

**Next steps**

- Identify partners to carry out trainings and follow-up activities in the US and other countries
- Secure funding to develop a Green Value smartphone application (we have the design!)

Please let us know if you would like to work with us!
