

Esther Parish of Oak Ridge National Laboratory is an earth scientist specializing in multi-scale analyses of bioenergy sustainability and climate change impacts, adaptation and vulnerability. Ms. Parish holds a B.S. Geology & Geophysics from Yale University and an M.S. in Geography from The University of Tennessee. She has been a Researcher with ORNL's Environmental Sciences Division for 6 years.

Dr. Natalie Griffiths of the Oak Ridge National Laboratory's Environmental Sciences Division is an aquatic ecologist and biogeochemist with research experience in carbon and nutrient cycling in anthropogenically-impacted aquatic ecosystems. Dr. Griffiths holds her PhD in Biological Sciences from the University of Notre Dame.

Dr. Henriette Jager of Oak Ridge National Laboratory's Environmental Sciences Division is a theoretical ecologist whose research focuses on understanding effects of renewable energy activities and ecological communities in order to identify management solutions that increase energy and benefit ecosystems. Dr. Jager holds a Ph.D. in Ecology and Evolutionary Biology from The University of Tennessee.
